About AssistiveWare® www.assistiveware.com

AssistiveWare is the worldwide leader in innovative assistive technology software for Mac OS X. In close collaboration with individual and institutional users we have developed Mac-only solutions for people with physical, speech, language and vision impairments. Our software provides full access to the computer, allowing students and other people with disabilities to use the same entertainment, educational, productivity and creative software as everyone else. Full function demos can be downloaded from our web site.
