

Changing Pictello's Voices

Pictello is a simple way to create talking photo albums and talking books. Each page in a Pictello Story can contain a picture, up to five lines of text, and a recorded sound or text-to-speech using high-quality voices. In this tutorial you will change characteristics of the Pictello text-to-speech system and download new voices.

 To change characteristics of the voices provided with Pictello, go to the options screen. Tap the *Options* button  in the lower right corner on any page that story and folder lists. The options screen is divided into sections. The voice section is at the top.

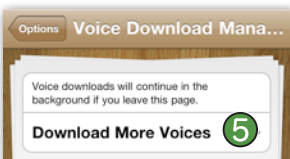

To adjust the volume of the device, you can either use the *Volume* slider  or use the volume buttons on your device. The volume slider adjusts the volume of all apps on the device, as do the physical volume buttons.

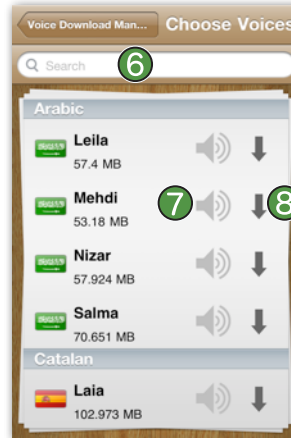

To adjust the speed of the speech, press *Speech Rate* . You'll see a list of choices for speech rate. The currently selected choice has a checkmark. Touch the row of the speed you would like. A sample will be read at the new speed.

Downloading Voices

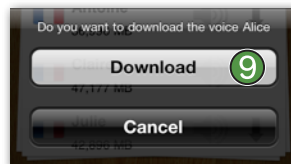

Pictello comes with two high-quality US English voices, Ryan and Tracy. Additional voices in 22 languages are available for free download.

To download a voice, press the *Voice Download Manager* row . Then press *Download More Voices* .

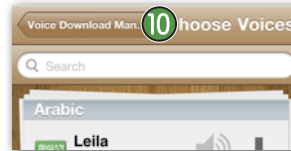

You will see a list of all the voices that have not yet been downloaded to your device, grouped alphabetically by language. You can scroll through the list, or search  by language or voice name. To hear a sample of the voice, tap the speaker icon . To download a voice, tap the down arrow .

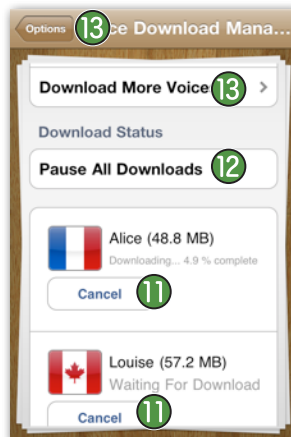

To confirm that you want to download a voice, tap *Download* . The voice will disappear from the list and the downloading will begin. You

can select multiple voices for download, and they will be downloaded one at a time in the order they were chosen.

When you've selected all the voices you want to download, tap the back button  to return to the *Voice Download Manager*.

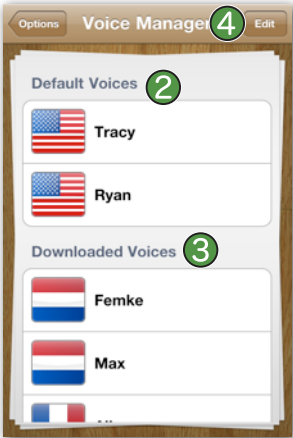

You will see a list of all the downloading voices. You can cancel any download by tapping its *Cancel* button . You can also pause all downloads . Your voices will continue downloading if you leave this page . You can continue to use all of Pictello's features while the voices download. Downloads will also continue while the app is in the background (for devices that support multitasking).

Managing Voices

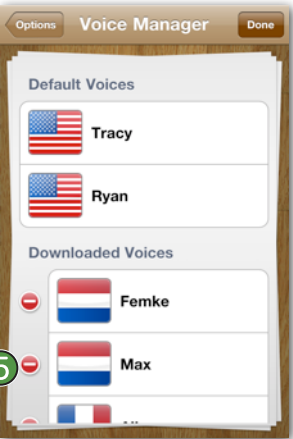

To see which voices have been downloaded to your device, or to remove downloaded voices, tap the *Voice Manager* 1 row in Options.

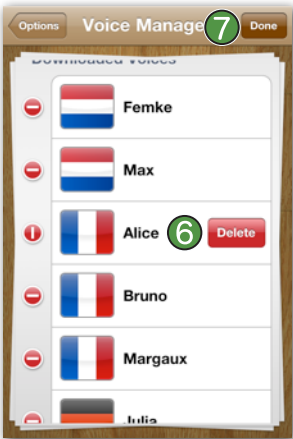

The first section 2 shows voices that are installed with Pictello. These voices can't be removed. The second section 3 is all the voices you have downloaded.

To remove a downloaded voice, tap the *Edit* 4 button.

To remove a voice, tap the red circle 5 on the left side of its row.

Confirm your deletion by tapping the *Delete* button 6. Tap the *Done* button 7 when you are finished removing voices.
