Access Edit Mode
Tap the pencil button on the bottom toolbar to access Edit Mode.

Go to Built-in Sounds and Expressions
Select the button you want to add a sound or expression to, and tap the Speech Code button (blue speech bubble with a plus sign) to access the list of built-in sounds and expressions.

Add Sounds or Expressions
Go to the Sounds or Expressions tab to access the sounds or expressions. Tap the speaker icon to sample a sound or expression. To select a sound or expression, tap its name. You can also use the search field at the top.

Add a Different Voice or Voice Qualities
As part of ExpressivePower, you can also have buttons with different voices and voice qualities. To change the voice and voice properties, scroll down to the Language section of the Edit panel and tap Speech. Here you can customize the voice, speech rate, pitch and volume.
