

Getting Information About Proloquo2Go

Launching Proloquo2Go

1. Navigate to the Proloquo2Go App on your device. 
2. Open up Proloquo2Go by tapping the Proloquo2Go icon.

Going to Options

1. Tap the Views button on the bottom toolbar. 
2. Then tap on the Options button. This will bring up the Options screen.

Getting Information

1. Scroll down to the About section.
2. Next, tap on Statistics.
3. In the Statistics screen you can see the vocabulary version, the number of categories, the total

number of items in the vocabulary, the number of default items that shipped with the vocabulary, the number of currently used items (this is related to the Vocabulary Size setting in Options). Also shown are the number of default items that were modified by the user, the number of user-defined items, the number of user-defined connections (e.g., links between items and categories), the number of items the user has deleted from the default vocabulary and from the user-defined items and, finally, the number of deleted connections.

4. Tap the Options button at the top of the screen to get back to the Options screen.

5. Tap the Help button to access the visual Proloquo2Go Getting Started manual.

6. Tap the Options button at the top of the screen to get back to the Options screen.

7. Tap the About button to see what version of Proloquo2Go you are currently using.

8. Tap the Options button at the top of the screen to get back to the Options screen.

9. Tap the Done button at the top of the screen to get back to main Proloquo2Go screen.
