

Using Social Sharing on iPad

Sharing via Email and Messages

1 Type your message

Tap anywhere on the Text Pad to show the keyboard and type a message you want to share.

2 Social Sharing

Tap the *Sharing* button (square with an arrow) on the top-left of the Text Pad.

3 Sharing via Email

Tap *Mail* in the Sharing Menu. A new email with the text from the Text Pad will appear. Address the message, type a subject, and tap the *Send* button to send your message.

To be able to share through email, make sure your Mail is configured on your device. For information on setting up email, see this Apple support document: support.apple.com/kb/HT4810

4 Sharing via Messages

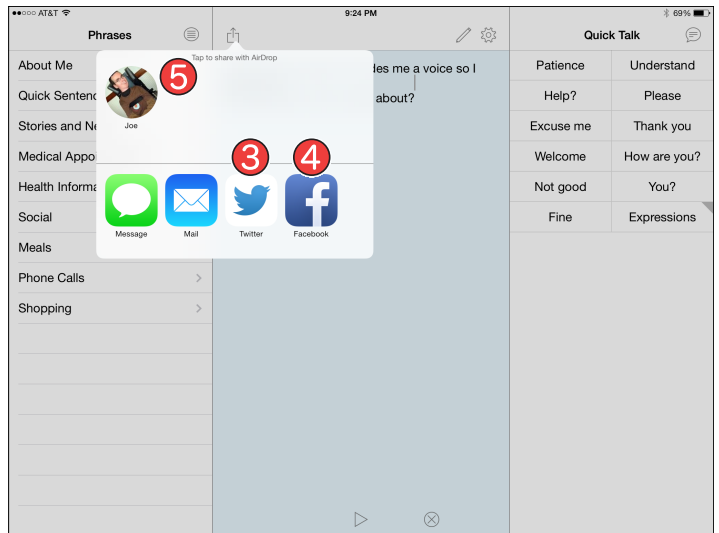

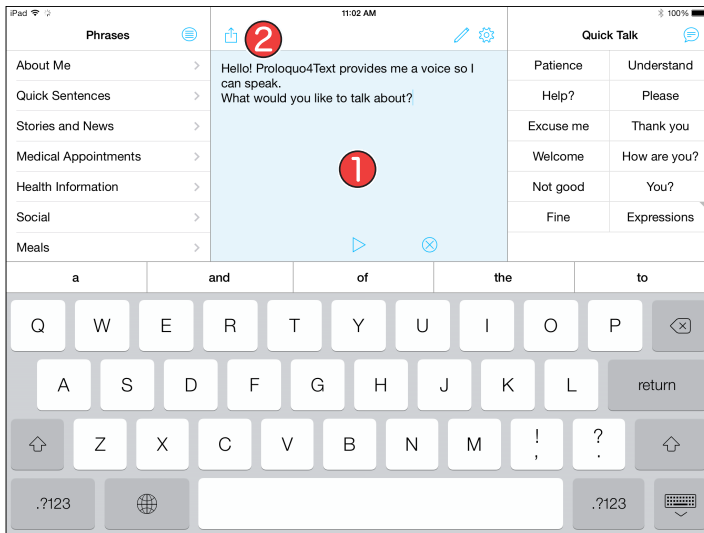

Tap *Messages* in the Sharing Menu. A new message will appear. Address your message. Tap the *plus* sign to select an address book contact. Tap the *Send* button to send your message. Note that you can only send messages to a phone number on iPhone.

To be able to share through Messages, make sure Messages is configured on your device. For information on setting up Messages, see this Apple support document: www.apple.com/ios/messages/

Using Social Sharing on iPad

Sharing via Facebook, Twitter and AirDrop

1 Type your message

Tap anywhere on the Text Pad to show the keyboard and type a message you want to share.

2 Social Sharing

Tap the *Sharing* button (square with an arrow) on the top-left of the Text Pad.

3 Sharing via Twitter

Tap on *Twitter* in the Sharing Menu. A new tweet with the text from the Text Pad will appear. Tap *Location* to add your current location. Note that you can disable this feature in the Settings app under *General > Restrictions*. Tap *Post* to send your tweet.

To be able to share through Twitter, make sure Twitter is configured on your device. For information on setting up Twitter, see this Apple support document: support.apple.com/kb/HT5500

4 Sharing via Facebook

Tap on *Facebook* in the Sharing Menu. A new post with the text from the Text Pad will appear. Tap *Location* to add your current location. Tap *Audience* to select who can view your post. Tap *Post* to post your message.

To be able to share through Facebook, make sure your Facebook is configured on your device. For information on setting up Facebook, see this Apple support document: support.apple.com/kb/HT5500

5 Sharing via AirDrop

AirDrop allows you to share the contents of the TextPad with nearby devices running iOS 7. Select a nearby user running AirDrop in the Sharing Menu. The user will then get a notification on their device that you would like to share text with them. When they accept, they are prompted to select an app to view it in.

To be able to share through AirDrop, go to the Settings app on your device's home screen, tap *Control Center*, and make sure *Access Within Apps* is set to ON. For information on setting up AirDrop and supported devices, see this Apple support document: support.apple.com/kb/HT5887
