

Save and Restore Backups using Dropbox

Making a New Internal Backup

1 Accessing the Options

Tap the *Options* button (the gear) on the top-right of the Text Pad to access the Options.

2 Going to Backup

In the Options, tap *Backups*.

3 Backing up all users

Tap *Back Up All Users Now* in the Backup Options to backup all users on your device.

4 Backing up current user

Tap *Back Up (User Name) Now* to create a backup of the current user.

Exporting Backups to Dropbox

1 Dropbox Integration

Toggle *Dropbox Integration* to ON to be able to export to Dropbox.

Exporting to the Dropbox App

If the Dropbox app is installed on your device, the app will be opened. If you haven't yet logged in, you will be asked for the email address and password. If you don't have a Dropbox account yet, you can sign up for one from within the Dropbox app.

Exporting to the Dropbox Website

If the Dropbox app is not installed on your device, the Safari web browser will open the Dropbox website (www.dropbox.com). Sign up for a free account, or if you already have an account, type your email address and password and tap *Sign in*.

After enabling Dropbox Integration, you will be asked if Proloquo4Text should be allowed to have access to a folder in your Dropbox. Tap the *Allow* button. Dropbox will only ask for your permission the first time you access through Proloquo4Text. Backup files that you export will be stored in the Apps > Proloquo4Text folder.

2 Exporting backups

In the Backups Options, tap *Export Backups* to export a backup to Dropbox.

3 Exporting to Dropbox

Tap on the backup that you want to export and select *Export to Dropbox*. A progress bar appears below the backup you are exporting. Note that this process may take a while depending on the size of the backup and the speed of your internet connection. Tap the *Cancel* button to interrupt the backup process.

Importing Backups from Dropbox

1 Importing from Dropbox Website

To import a backup from the Dropbox website, open Safari on your device and go to www.dropbox.com. If necessary, sign into your account and open the Apps > Proloquo4Text folder. Select a backup, and then select *Open in "Proloquo4Text"*.

2 Importing from Dropbox App

To import a backup from the Dropbox app, go to the Dropbox app on your device. If necessary, sign into your account and open the Apps > Proloquo4Text folder. Select a backup. A message will appear stating "*No Preview Available*". Tap the *Sharing* button (downward arrow) in the top-right corner, and then select *Open In...* From the options, choose *Copy to Proloquo4Text*.

3 Finishing the Import

After importing the backup, you will be prompted to restore the backup now or later. If the backup you are restoring is from a different user than the one that is currently active, you can either overwrite the current user with the backup from the other user, or you can switch to the other user and restore it from the selected backup file.

Restoring Backups Later

1 Going to Backups

If you decide to restore a backup later, in the Options, tap *Backups*.

2 Restoring from Backup

Tap *Restore from Backup* and select a backup to restore.

3 Restoring Backup from another user

If you select to restore a backup from a different user than the one that is currently active, you can either overwrite the current user with the backup from the other user, or you can switch to the other user and restore it from the selected backup file.
